GENERAL DESCRIPTION

These coverages are counterparts to the DES Groundwater Protection Bureau’s database inventory of potential and existing threats to groundwater quality. A partial listing of the types of sites included in the inventory follows:

- Groundwater release detection sites
- Hazardous waste sites
- Isolated groundwater sample sites
- Lagoons: lined wastewater, unlined wastewater, seapage, sludge
- Landfills/dumps
  - Existing landfill/landfill closure
  - Municipal/commercial stomp or demolition dump
  - Old open dump sites
  - Lined landfills
- Non-hazardous, non-sanitary holding tanks
- Oil spills or releases
- Rapid infiltration basins
- Remediation recharge areas
- Subsurface wastewater disposal systems
- Sludge application sites
- Solid waste transfer sites
- Spray irrigation projects
- Superfund sites
- Underground injection control
- Underground storage tanks, leaking
- Underground storage tank removals
- Waste-to-energy incinerators

Development of these coverages is ongoing; release is subject to approval of the DES Groundwater Protection Bureau.
