Data Layer: 1974 Digital Orthophoto Mosaics

Primary Layer Name: 74DOMnnn
where 'nnn' - County FIPS code

Layer Content: Digital Orthophoto Mosaics

Data Structure: RASTER

Layer Type: IMAGE (.img files compressed with MrSID)

Source: CSRC, UNH

Source Scale: 1:20,000

Source Media: DIGITAL

Automated By: CSRC, UNH

Coordinate Reference: NH State Plane Feet

Horizontal Datum: 1983

Tile: COUNTY

Status: COMPLETE

Last Revision: March, 2004

Available From: Complex Systems Research Center, UNH

GENERAL DESCRIPTION

This data set contains county wide mosaics of 1974 1:20,000-scale, black & white aerial photos. They were developed by scanning and orthorectifying individual photographs, and combining a subset of the resulting digital images into the mosaics.

In addition to the hardcopy photos, the primary data sources used in the photo orthorectification included 1998 1:12,000-scale Digital Orthophoto Quarterquads (DOQs) and 30-meter Digital Elevation Models (DEMs).

This mosaic of historic orthophotography provides a visual perspective of the landscape in the early 1970's. Due to its geometric qualities, it is useful as a reference layer in a geographic information system, and provides a valuable tool for land use mapping and change analysis.
