

USGS QUADRANGLES/ 24K

Data Availability:

State complete

Data Layer: USGS QUADRANGLES

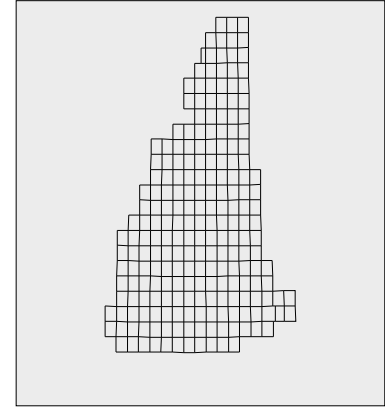

Primary Layer Name: QUADS
 Layer Content: USGS 7.5-MINUTE QUADRANGLES
 Data Structure: VECTOR
 Layer Type: POLYGON

Source: DIGITALLY GENERATED
 Source Scale: N/A
 Source Media: DIGITAL

Automated By: CSRC, UNH
 Coordinate Reference: NH State Plane Feet
 Horizontal Datum: 1983
 Tile: STATE

Status: COMPLETE
 Last Revision: October, 1996
 Available From: Complex Systems Research Center,
 UNH

NEW HAMPSHIRE 7.5-MINUTE QUADRANGLES

GENERAL DESCRIPTION

The QUADSNH coverage was digitally generated to provide a reference template for the GRANIT data layers. The polygons are coded with the GRANIT ID (a sequential, project-specific id created for data management purposes), and the USGS quadrangle name.

The data is also available referenced to the 1927 datum (QUADS27D).
